It should be pointed out that, because each one is entirely hand-made using second hand materials, there are slight variations in size and shape. I mainly use our local newspaper, the Eastern Daily Press, and I do try to make sure that some pages which may cause upset (reports of gruesome crimes or even the local obituaries, for instance) are not visible on the outside of the bags. I try to ensure that any mention of 'Tesco' or similarly offensive words are neatly edited out with my black felt tip pen and I cannot guarantee that any crossword puzzles will not already be completed.

The bags are supplied either blank or personalised, for a small extra charge, with a sticker of the retailer's own design on each side.

For light to medium weight goods (less than 2kg) a 2 ply bag is adequate. For heavier goods (up to 4kg) 3 ply bags are a much sturdier version.

For retailers needing bags suitable for food packaging I would recommend using bags with an additional 'food safe' white paper lining, available for an extra charge.

Bags are available in either 'standard' style, with no carrying handles, or with string handles and a reinforced rim.

All styles are approximately the same dimensions:

(Height 28cm / Width 20cm / Depth 8cm).
